ENVIRONMENTAL MANAGEMENT

Description:

Concentrated bleaching agent formulated with PEROXYHEXANOIC ACID (CAPROIC) for automatic dosing systems. Very stable product in its composition (it does not alter its bleaching properties) and completely safe to handle and use. Reduces fabric wrinkling, facilitates ironing, removes dirt traces, enhances whiteness and noticeably brightens colours.

Key Properties:

To be used in the bleaching cycle during the first rinse or directly during cleaning, a few minutes after adding the detergent.

Use Instructions:

For cotton fabrics, use 4-8 g per kg of dry clothes at a maximum temperature of 40°C. For temperatures above 40°C, use 2-6 g per kg of dry clothes.

For synthetic or blended fabrics, use 5-10 g per kg of dry clothes at a maximum temperature of 40°C. For temperatures above 40°C, use 3-8 g per kg of dry clothes. (Dispensers depending on the degree of soiling of the clothes and water temperature level).

Technical Data:

* PROPERTIES:

Product for bleaching and stain removal of all types of textiles at low temperatures.

* SPECIFICATIONS:

APPEARANCE:	Liquid viscous
COLOUR:	White
ODOUR:	Odourless
DENSITY (20°):	1000 - 1040 kg/m ³
pH:	3 - 4

* COMPOSITION: Mixture composed of organic substances.

Conservation and storage:

Store in the original, tightly closed container, protecting it from intense heat and cold. Avoid freezing. Do not expose to direct sunlight.

Security and Handling:

WARNING. Causes serious eye irritation. Wear protective gloves/eye protection. IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do – continue rinsing. If eye irritation persists: Get medical advice/attention. FOR PROFESSIONAL USE.

Warning:

In case of accident, consult with your Poisons Information Service (+34 915620420 for Spanish residents).

Our TECHNICAL DEPARTMENT will respond to any doubt or query regarding the product or its application, without any obligation.
